

# FERNANDO CHIRIGATI

## CURRICULUM VITÆ

### CONTACT INFORMATION

NYU Tandon School of Engineering ◦ CSE Department  
2 MetroTech Center, 10th Floor ◦ Brooklyn, NY 11201, USA  
✉ [fchirigati@nyu.edu](mailto:fchirigati@nyu.edu)  
🌐 <https://fchirigati.com>

### EDUCATION

- Jan 2012 – Present **Ph.D., Computer Science**, *NYU Tandon School of Engineering, Brooklyn – USA*.  
Advisor: Juliana Freire, Ph.D.
- Jan 2007 – Dec 2011 **B.E., Computer and Information Engineering**, *Federal University of Rio de Janeiro, Rio de Janeiro – Brazil*.  
Advisor: Marta Mattoso, D.Sc.
- Aug 2010 – Dec 2010 **One-Semester Exchange Program**, *University of Central Florida, Orlando – USA*.  
Scholarship granted by the Brazilian government.

### RESEARCH INTERESTS

Data Management ◦ Data Mining ◦ Large-Scale Data Analytics  
Provenance Management and Analytics ◦ Reproducibility ◦ Data Visualization

### RESEARCH EXPERIENCE

Details on the research projects can be found on the next page.

- Jan 2012 – Present **Research Assistant**  
NYU Tandon School of Engineering, Brooklyn – USA  
Supervisor: Juliana Freire  
Research Projects: *Urban Data Management and Analytics*, *Reproducibility in Science*
- May 2016 – Aug 2016 **Summer Research Intern**  
New York Structured Data Research Group  
Google Research, New York City – USA  
Supervisors: Flip Korn and Cong Yu  
Research Project: *Understanding Tables on the Web through Automatic Visualizations*
- May 2015 – Aug 2015 **Summer Research Intern**  
New York Structured Data Research Group  
Google Research, New York City – USA  
Supervisors: Flip Korn and Cong Yu  
Research Project: *Enhancing Search Results with Knowledge Carousels*

- Jun 2012 – Jan 2015 **DataONE Working Group Member**  
Scientific Workflows and Provenance Working Group
- Jun 2013 – Aug 2013 **Summer Research Intern**  
IBM T. J. Watson Research Center, Yorktown Heights – USA  
Supervisors: Jérôme Siméon and Martin Hirzel  
Research Project: *Bridging the Gap between Big and Fast Data*
- Jan 2009 – Feb 2009 **Research Intern**  
University of Utah, Salt Lake City – USA  
Supervisors: Juliana Freire and Cláudio T. Silva  
Research Project: *Development of Control-Flow Structures for VisTrails*
- Aug 2007 – Aug 2010 **Research Assistant**  
Federal University of Rio de Janeiro, Rio de Janeiro – Brazil  
Supervisor: Marta Mattoso  
Research Projects: *Data Provenance in Scientific Experiments, Management of Large-Scale Scientific Experiments*

---

## RESEARCH PROJECTS

- Aug 2014 – Present **Urban Data Management and Analytics**  
NYU Tandon School of Engineering, Brooklyn – USA  
*Description:* Discovering relationships between spatio-temporal urban datasets can lead to many insights and help understand how the city behaves. Given the sheer number and size of the data sets, and the diverse spatial and temporal scales at which the data is available, this task presents computational challenges on all fronts, from indexing and querying to analyzing the relationships. Also, it is non-trivial to differentiate between meaningful and spurious relationships. This project takes a first step towards addressing these challenges and proposing a solution that is scalable and effective at identifying potentially meaningful relationships.
- Jan 2012 – Present **Reproducibility in Science**  
NYU Tandon School of Engineering, Brooklyn – USA  
*Description:* While reproducibility is a core component of the scientific process, science falls far short of reproducible results. Most computational experiments are specified only informally in papers, where experimental results are briefly described in figure captions; the code that produced the results is seldom available; and configuration parameters change results in unforeseen ways. This project is focused on developing a suite of tools and infrastructure that supports the process of sharing, testing, and re-using scientific experiments and results. In particular, the goal is to assist researchers in streamlining their research process to make their data interoperable and reproducible. ReproZip and noWorkflow are examples of outcomes of the project.
- May 2016 – Aug 2016 **Understanding Tables on the Web through Automatic Visualizations**  
Google Research, New York City – USA  
*Description:* Tables on the Web, also known as WebTables, are a valuable source of information since they are mostly human-curated, thus representing concepts and facts that are interesting to users in a tabular, semi-structured format. The goal of this project is to use this data to automatically generate visualizations, or charts, that give insightful summaries of the table content and pinpoint interesting facts to users. Different challenges need to be addressed in this project, including providing and using intelligent table annotations to make better sense of the semi-structure data, and ranking the generated charts.

2 MetroTech Center, 10th Floor – Brooklyn, NY 11201, USA

✉ [fchirigati@nyu.edu](mailto:fchirigati@nyu.edu) • 🌐 <https://fchirigati.com>

- May 2015 – Aug 2015 **Enhancing Search Results with Knowledge Carousels**  
 Google Research, New York City – USA  
*Description:* The increasing popularity of mobile device usage has ushered in many features in modern search engines that help users with various information needs. One of those needs is knowledge exploration, where related documents are returned in response to a user query, either directly through right-hand side knowledge panels or indirectly through navigable sections underneath individual search results. Existing knowledge exploration features have relied on a combination of Knowledge Bases and query logs. In this project, the goal is to generate knowledge carousels to facilitate knowledge exploration with regard to an entity-seeking query, based on leveraging the large corpus of tables on the Web. This brings many technical challenges, including associating correct carousels with the search entity, selecting the best carousel from the candidates, and finding titles that best describe the carousel.
- Jun 2013 – Aug 2013 **Bridging the Gap between Big and Fast Data**  
 IBM T. J. Watson Research Center, Yorktown Heights – USA  
*Description:* Increasingly, applications that deal with big data need to run analytics concurrently with updates. But bridging the gap between big and fast data is challenging: most of these applications require analytics' results that are fresh and consistent, but without impacting system latency and throughput. The focus of this project is on designing algorithms and data structures to enable consistent analytics without blocking incoming updates in NoSQL stores.
- Jan 2009 – Feb 2009 **Development of Control-Flow Structures for VisTrails**  
 University of Utah, Salt Lake City – USA  
*Description:* While scientific workflows are mostly data-oriented, often represented as directed acyclic graphs, control-flow structures are sometimes required to specify how the data flow should be directed. The goal of this project is to add such control-flow structures to the workflow system VisTrails.
- Jul 2009 – Aug 2010 **Management of Large-Scale Scientific Experiments**  
 Federal University of Rio de Janeiro, Rio de Janeiro – Brazil  
*Description:* Many different scientific areas, including deep-sea oil exploitation and bioinformatics, require simulating large-scale experiments. These simulations must be designed efficiently to avoid the overconsumption of computational resources, as this can become incredibly expensive. In this project, the focus is on building tools to design scientific workflows for such simulations, from its conception to its execution and provenance analysis. The use of provenance data is key in this project: by analyzing ongoing and past executions, previous results can be re-used, thus avoiding expensive, redundant computations.
- Aug 2007 – Jul 2009 **Data Provenance in Scientific Experiments**  
 Federal University of Rio de Janeiro, Rio de Janeiro – Brazil  
*Description:* As the amount of data becomes massive and the nature of the scientific workflows becomes more heterogeneous, with data and tasks located in a distributed manner, the need for integrating provenance from the different experiment steps becomes more evident. The goal of this project is to propose efficient solutions, developed in scientific workflow systems, to store and analyze such provenance data, while integrating the different pieces into a single queryable store.

---

## AWARDS AND HONORS

- Honorable Mention **Best Demonstration – SIGMOD 2017**  
*Querying and Exploring Polygamous Relationships in Urban Spatio-Temporal Data Sets*  
2017
- Award **Most Reproducible Paper – SIGMOD 2017**  
*Data Polygamy: The Many-Many Relationships among Urban Spatio-Temporal Data Sets*  
2017
- Award **Student Travel Award – SIGMOD 2017**  
2017
- Award **Pearl Brownstein Doctoral Research Award – NYU Tandon**  
Doctoral research that shows the greatest promise.  
2016
- 2<sup>nd</sup> Place **Programming Contest – SIGMOD 2014**  
Together with Tuan-Anh Hoang-Vu, Kien Pham, and Huy T. Vo.  
2014
- Award **Deborah Rosenthal, MD Award – NYU Tandon**  
Outstanding performance on the Ph.D. qualifying examination.  
2014
- Honorable Mention **A3P Special Honor – Federal University of Rio de Janeiro**  
Outstanding performance achieved at the Federal University of Rio de Janeiro, given by the Alumni Association of the Polytechnic School (A3P).  
2013
- Honorable Mention **Magna Cum Laude Honor – Federal University of Rio de Janeiro**  
Outstanding performance achieved in Computer and Information Engineering.  
2013
- Honorable Mention **Research Honor – Federal University of Rio de Janeiro**  
Given by the Academic Deliberative Council of Graduate Department of Engineering (COPPE).  
2010
- Award **Best Poster – XXIV Brazilian Symposium on Databases**  
*Development of Explicit Control Structures for SWfMS VisTrails (in Portuguese)*  
2009
- Honorable Mention **Best Presentation – Federal University of Rio de Janeiro**  
Top 10 presentations among more than 500 presentations, during the XXXI Conference on Young Research Assistant.  
2010

---

## PUBLICATIONS

### JOURNALS

- 2018 *Provenance and the Different Flavors of Computational Reproducibility*, J. Freire and **F. Chirigati**. In IEEE Data Engineering Bulletin, 41(1), pp. 15-26, 2018
- 2016 *ReproZip: The Reproducibility Packer*, R. Rampin, **F. Chirigati**, D. Shasha, J. Freire, and V. Steeves. In Journal of Open Source Software (**JOSS**), 2016  
Link to code: <https://github.com/ViDA-NYU/reprozip/>
- Knowledge Exploration Using Tables on the Web*, **F. Chirigati**, J. Liu, F. Korn, Y. Wu, C. Yu, and H. Zhang. In Proceedings of the VLDB Endowment (**PVLDB**), 10(3), pp. 193-204, 2016
- Exploring What not to Clean in Urban Data: A Study Using New York City Taxi Trips*, J. Freire, A. Bessa, **F. Chirigati**, H. T. Vo, and K. Zhao. In IEEE Data Engineering Bulletin, 39(2), pp. 63-77, 2016
- 2015 *YesWorkflow: A User-Oriented, Language-Independent Tool for Recovering Workflow Information from Scripts*, T. McPhillips, T. Song, T. Kolisnik, S. Aulenbach, K. Belhajjame, R. Kyle Bocinsky, Y. Cao, J. Cheney, **F. Chirigati**, S. Dey, J. Freire, C. Jones, J. Hanken, K. W. Kintigh, T. A. Kohler, D. Koop, J. A. Macklin, P. Missier, M. Schildhauer, C. Schwalm, Y. Wei, M. Bieda, B. Ludäscher. In International Journal of Digital Curation (**IJDC**), 10(1), pp. 298-313, 2015
- 2014 *The More the Merrier: Efficient Multi-Source Graph Traversal*, M. Then, M. Kaufmann, **F. Chirigati**, T. Hoang-Vu, K. Pham, A. Kemper, T. Neumann, and H. T. Vo. In Proceedings of the VLDB Endowment (**PVLDB**), 8(4), pp. 449-460, 2014  
Link to code: <https://github.com/mtodat/ms-bfs/>
- The PBase Scientific Workflow Provenance Repository*, V. Cuevas-Vicenttín, P. Kianmajd, B. Ludäscher, P. Missier, **F. Chirigati**, Y. Wei, D. Koop, and S. Dey. In International Journal of Digital Curation (**IJDC**), 9(2), pp. 28-38, 2014
- 2013 *A Computational Reproducibility Benchmark*, **F. Chirigati**, M. Troyer, D. Shasha, and J. Freire. In IEEE Data Engineering Bulletin, 36(4), pp. 54-59, 2013
- Chiron: A Parallel Engine for Algebraic Scientific Workflows*, E. Ogasawara, J. Dias, V. Souza, **F. Chirigati**, D. Oliveira, F. Porto, P. Valduriez, and M. Mattoso. In Journal of Concurrency and Computation: Practice and Experience, 25(16), pp. 2327-2341, 2013
- 2011 *Similarity-Based Workflow Clustering*, V. Souza, **F. Chirigati**, K. Maia, E. Ogasawara, D. Oliveira, V. Braganholo, L. Murta, and M. Mattoso. In Journal of Computational Interdisciplinary Sciences, vol. 2, pp. 23-35, 2011

### CONFERENCES AND WORKSHOPS

- 2017 *Querying and Exploring Polygamous Relationships in Urban Spatio-Temporal Data Sets*, Y. Chan, **F. Chirigati**, H. Doraiswamy, C. Silva and J. Freire. In Proceedings of the 2017 ACM SIGMOD International Conference on Management of Data (**SIGMOD**), pp. 1643-1646, 2017  
**Honorable Mention, SIGMOD Best Demonstration Award**

- 2016 *Data Polygamy: The Many-Many Relationships among Urban Spatio-Temporal Data Sets*, **F. Chirigati**, H. Doraiswamy, T. Damoulas, and J. Freire. In Proceedings of the 2016 ACM SIGMOD International Conference on Management of Data (**SIGMOD**), pp. 1011-1025, 2016  
Link to code: <https://github.com/ViDA-NYU/data-polygamy/>  
**SIGMOD Most Reproducible Paper Award**
- ReproZip: Computational Reproducibility With Ease*, **F. Chirigati**, R. Rampin, D. Shasha, and J. Freire. In Proceedings of the 2016 ACM SIGMOD International Conference on Management of Data (**SIGMOD**), pp. 2085-2088, 2016  
Link to code: <https://github.com/ViDA-NYU/reprozip/>
- Virtual Lightweight Snapshots for Consistent Analytics in NoSQL Stores*, **F. Chirigati**, J. Siméon, M. Hirzel, and J. Freire. In Proceedings of the 32nd International Conference on Data Engineering (**ICDE**), pp. 1310-1321, 2016  
Link to code: <https://github.com/ViDA-NYU/mongodb-vls/>
- 2015 *noWorkflow: Capturing and Analyzing Provenance of Scripts*, L. Murta, V. Braganholo, **F. Chirigati**, D. Koop, and J. Freire. In Provenance and Annotation of Data and Processes, vol. 8628, Lecture Notes in Computer Science (**LNCS**), pp. 71-83, Springer International Publishing, 2015  
Link to code: <https://github.com/gems-uff/noworkflow/>
- 2013 *Packing Experiments for Sharing and Publication*, **F. Chirigati**, D. Shasha, and J. Freire. In Proceedings of the 2013 International Conference on Management of Data (**SIGMOD**), pp. 977-980, 2013  
Link to code: <https://github.com/ViDA-NYU/reprozip/>
- ReproZip: Using Provenance to Support Computational Reproducibility*, **F. Chirigati**, D. Shasha, and J. Freire. In Proceedings of the 5th USENIX Conference on Theory and Practice of Provenance (**TaPP**), 2013
- VisTrails Provenance Traces for Benchmarking*, **F. Chirigati**, D. Koop, J. Freire, and C. Silva. In Proceedings of the 2013 Joint **EDBT/ICDT** Workshops, pp. 323-324, 2013
- 2012 *Towards Integrating Workflow and Database Provenance*, **F. Chirigati** and J. Freire. In Provenance and Annotation of Data and Processes, vol. 7525, Lecture Notes in Computer Science (**LNCS**), pp. 11-23, Springer Berlin / Heidelberg, 2012
- Evaluating Parameter Sweep Workflows in High Performance Computing*, **F. Chirigati**, V. Souza, E. Ogasawara, D. Oliveira, J. Dias, F. Porto, P. Valduriez, and M. Mattoso. In Proceedings of the 1st International Workshop on Scalable Workflow Enactment Engines and Technologies (**SWEET**), article 2, 2012
- 2011 *An Evaluation of the Distribution of Dynamic and Static Activities in Parallel Environments using Hydra*, V. Souza, **F. Chirigati**, E. Ogasawara, J. Dias, D. Oliveira, F. Porto, P. Valduriez, and M. Mattoso. In Proceedings of the XXXI Congress of the Brazilian Computer Society, 2011  
*In Portuguese*
- 2010 *SimiFlow: An Architecture for Clustering Workflows by Similarity*, V. Souza, **F. Chirigati**, K. Maia, E. Ogasawara, D. Oliveira, V. Braganholo, L. Murta, and M. Mattoso. In Proceedings of the XXX Congress of the Brazilian Computer Society, 2010  
*In Portuguese*

- GExpLine: A Tool for Supporting Experiment Composition*, D. Oliveira, E. Ogasawara, **F. Chirigati**, V. Souza, L. Murta, and M. Mattoso. In *Provenance and Annotation of Data and Processes*, vol. 6378, Lecture Notes in Computer Science (LNCS), pp. 251-259, Springer Berlin / Heidelberg, 2010
- 2009 *A Semantic Approach for Scientific Experiment Lines using Ontologies*, D. Oliveira, E. Ogasawara, **F. Chirigati**, V. Souza, L. Murta, C. Werner, and M. Mattoso. In *Proceedings of the III e-Science Workshop, XXIV Brazilian Symposium on Databases*, 2009  
*In Portuguese*
- Scientific Workflow Management System Applied to Uncertainty Quantification in Large Eddy Simulation*, G. Guerra, F. Rochinha, R. Elias, A. Coutinho, V. Braganholo, D. Oliveira, E. Ogasawara, **F. Chirigati**, and M. Mattoso. In *Proceedings of the 30th Iberian-Latin-American Congress on Computational Methods in Engineering (CILAMCE)*, 2009
- Exploring Many Task Computing in Scientific Workflows*, E. Ogasawara, D. Oliveira, **F. Chirigati**, C. E. Barbosa, R. Elias, V. Braganholo, A. Coutinho, and M. Mattoso. In *Proceedings of the 2nd Workshop on Many-Task Computing on Grids and Supercomputers, International Conference for High Performance, Networking, Storage and Analysis (SC)*, 2009
- 2008 *Expliciting Control Flow in Scientific Workflows*, S. M. S. Cruz, **F. Chirigati**, R. Dahis, M. L. M. Campos, and M. Mattoso. In *Proceeding of the II e-Science Workshop, XXIII Brazilian Symposium on Databases*, 2008
- Using Explicit Control Processes in Distributed Workflows to Gather Provenance*, S. M. S. Cruz, **F. Chirigati**, R. Dahis, M. L. M. Campos, and M. Mattoso. In *Provenance and Annotation of Data and Processes*, vol. 5272, Lecture Notes in Computer Science (**LNCS**), pp. 186-199, Springer Berlin / Heidelberg, 2008

## BOOK CHAPTERS

- 2017 *Glossary*, A. Rokem and **F. Chirigati**. In J. Kitzes, D. Turek, and F. Deniz (Eds.), *The Practice of Reproducible Research: Case Studies and Lessons from the Data-Intensive Sciences*, 2017
- Provenance and Reproducibility*, **F. Chirigati** and J. Freire. In L. Liu and M. T. Özsu (Eds.), *Encyclopedia of Database Systems*, 2017
- 2014 *Reproducibility Using VisTrails*, J. Freire, D. Koop, **F. Chirigati**, and C. Silva. In V. Stodden, F. Leisch, and R. Peng (Eds.), *Implementing Reproducible Research (The R Series)*, 2014

## EDITORIALS

- 2016 *A Collaborative Approach to Computational Reproducibility*, **F. Chirigati**, R. Capone, R. Rampin, J. Freire, and D. Shasha. In *Information Systems*, vol. 59, pp. 95-97, 2016

## POSTERS

- 2016 *Enhancing Scholarly Communication with ReproZip*, **F. Chirigati**, R. Rampin, V. Steeves, D. Shasha, and J. Freire. *FORCE2016 Conference*, 2016
- 2014 *Constructing a Social Network Analysis System for SIGMOD 2014 Programming Contest*, **F. Chirigati**, K. Pham, T. Hoang-Vu, and H. T. Vo. *SIGMOD 2014 Programming Contest*, 2014

*Provenance Storage, Querying, and Visualization in PBase*, V. Cuevas-Vicenttín, P. Kianmajd, B. Ludäscher, P. Missier, **F. Chirigati**, Y. Wei, D. Koop, and S. Dey. In Proceedings of the International Provenance and Annotation Workshop (IPAW), 2014

2013 *ReproZip: Packing Experiments for Sharing and Publication*, **F. Chirigati**, D. Shasha, and J. Freire. Beyond the PDF 2 Conference, 2013

2009 *Procedure to Build Scientific Workflows*, M. P. Rodrigues, J. C. C. Fernandez, **F. Chirigati**, S. M. S. Cruz, and M. C. R. Cavalcanti. XXIV Brazilian Symposium on Databases, 2009  
*In Portuguese*

*Development of Explicit Control Structures for VisTrails*, **F. Chirigati**, R. Dahis, S. M. S. Cruz, J. Freire, C. Silva, and M. Mattoso. XXIV Brazilian Symposium on Databases, 2009

**Best Poster Award**

*In Portuguese*

*A Conception Process for Abstract Workflows: An Example on Deep Water Oil Exploitation Domain*, W. Martinho, E. Ogasawara, D. Oliveira, **F. Chirigati**, F. Correa, B. Jacob, I. Santos, G. H. Travassos, and M. Mattoso. 5th IEEE International Conference on e-Science, 2009

## REPRODUCIBILITY PAPERS

2017 *HESML: A Scalable Ontology-based Semantic Similarity Measures Library with a Set of Reproducible Experiments and a Replication Dataset*, J. Lastra-Díaz, A. García-Serrano, M. Batet, M. Fernández, and **F. Chirigati**. In Information Systems, vol. 66, pp. 97-118, 2017

2016 *Reproducible Experiments on Dynamic Resource Allocation in Cloud Data Centers*, A. Wolke, M. Bichler, **F. Chirigati**, and V. Steeves. In Information Systems, vol. 59, pp. 98-101, 2016

---

## PRESENTATIONS

2017 **Data Polygamy: The Many-Many Relationships among Urban Spatio-Temporal Data Sets**

Invited Talk at University of Münster  
Münster, Germany, 2017

**Preserving and Reproducing Research with ReproZip**

Invited Talk at Brainhack NYC  
New York City, USA, 2017

2016 **Data Polygamy: The Many-Many Relationships among Urban Spatio-Temporal Data Sets**

AWS re:Invent 2016  
Las Vegas, USA, 2016

**Preserving and Reproducing Research with ReproZip**

Preservation and Archiving Special Interest Group (PASIG), Fall 2016 Meeting  
New York City, USA, 2016

**Data Polygamy: The Many-Many Relationships among Urban Spatio-Temporal Data Sets**

International Conference on Management of Data (SIGMOD)  
San Francisco, USA, 2016

2 MetroTech Center, 10th Floor – Brooklyn, NY 11201, USA

✉ [fchirigati@nyu.edu](mailto:fchirigati@nyu.edu) • 🌐 <https://fchirigati.com>

### **Virtual Lightweight Snapshots for Consistent Analytics in NoSQL Stores**

32nd International Conference on Data Engineering (ICDE)

Helsinki, Finland, 2016

### **ReproZip: Computational Reproducibility with Ease**

Dagstuhl Seminar 16041, Reproducibility of Data-Oriented Experiments in e-Science

Wadern, Germany, 2016

### 2015 **Achieving Reproducibility with ReproZip**

Invited talk at the CS Colloquium, Columbia University

New York City, USA, 2015

### **Facilitating Reproducibility After the Fact**

BIDS Reproducibility Conference, University of California, Berkeley

Berkeley, USA, 2015

### **Facilitating Reproducibility After the Fact**

Reproducibility Seminar, eScience Institute, University of Washington

Seattle, USA, 2015

### 2014 **Constructing a Social Network Analysis System for SIGMOD 2014 Programming Contest**

SIGMOD Programming Contest

Snowbird, USA, 2014

### 2013 **ReproZip: Packing Experiments for Sharing and Publication**

Workshop on Software Infrastructure for Reproducibility in Science

Brooklyn, USA, 2013

### **ReproZip: Packing Experiments for Sharing and Publication**

Beyond the PDF 2 Conference – Visions of the Future Session

Amsterdam, Netherlands, 2013

### 2012 **ReproZip: Packing Experiments for Sharing and Publication**

ICERM Workshop on Reproducibility in Computational and Experimental Mathematics

Providence, USA, 2012

### **Towards Integrating Workflow and Database Provenance**

4th International Provenance and Annotation Workshop (IPAW)

Santa Barbara, USA, 2012

### **Evaluating Parameter Sweep Workflows in High Performance Computing**

1st International Workshop on Scalable Workflow Enactment Engines and Technologies (SWEET)

Scottsdale, USA, 2012

---

## PROFESSIONAL ACTIVITIES

2015 – Present

### **Reproducibility Editor**

Information Systems Journal, Elsevier North-Holland

### 2018 **Program Committee Member – Research Track**

Very Large Data Bases (VLDB) Conference, 2018

*2 MetroTech Center, 10th Floor – Brooklyn, NY 11201, USA*

✉ [fchirigati@nyu.edu](mailto:fchirigati@nyu.edu) • 🌐 <https://fchirigati.com>

### **Program Committee Member – Demo Track**

ACM International Conference on Management of Data (SIGMOD), 2018

2017 **Program Committee Member**

SciPy Conference, 2017

2016 **Reproducibility Committee Member**

ACM International Conference on Management of Data (SIGMOD), 2016

### **Artifact Evaluation Committee Member**

European Conference on Object-Oriented Programming (ECOOP), 2016

2015 **Reproducibility Committee Member**

ACM International Conference on Management of Data (SIGMOD), 2015

### **Artifact Evaluation Committee Member**

European Conference on Object-Oriented Programming (ECOOP), 2015

2013 **Student Volunteer**

ACM International Conference on Management of Data (SIGMOD), 2013

### **Co-Organizer**

Workshop on Software Infrastructure for Reproducibility in Science, Brooklyn, USA, 2013

### **Co-Organizer**

Workshop on Reproducibility in Science, Brooklyn, USA, 2013

---

## **FREELY-AVAILABLE SOFTWARE SYSTEMS**

### **Data Polygamy**

<https://github.com/ViDA-NYU/data-polygamy/>

Data Polygamy is a scalable topology-based framework that allows users to query for statistically significant relationships between spatio-temporal datasets.

### **ReproZip**

<https://www.reprozip.org/>

ReproZip is a tool that automatically captures provenance of experiments and packs all the necessary files, library dependencies, and variables to reproduce the results. Reviewers can then unpack and run the experiments without having to install any additional software.

### **noWorkflow**

<http://gems-uff.github.io/noworkflow/>

noWorkflow is a tool that can transparently capture detailed provenance information from Python scripts. It is non-intrusive, does not require users to change the way they work, and provides different ways to analyze the captured provenance.
